County Future Farmers Win 26 State Awards

Twenty-six awards were won by Lancaster County Future Farmers of America at the annual State FFA Week on the Pennsylvania State University campus which concluded yesterday.

The state championship for parliamentary procedure went to a team from Garden Spot High School, New Holland, which included Ken Martin, Clyde Wissler, Fred Nolt, Walter Musser, Leon Weaver, Nelson Wert, John Campbell and Roy Musser Their teacher-coaches are Robert Herr and Gene Daugherty. Their prize will be a trip in or near Pennsylvania.

Gold medals in Farm Mechanics, in which 129 contestants took part, were won by Jay Herr, Lampeter-Strasburg, and Wilmer Shertzer, of Penn Manor. Other winners in the same division were Philip Ehrhart, Warwick, silver medal, Paul R Weaver, Ephrata, and James Nolt, Donegal, bronze medals, Donald Herr, Lampeter-Strasburg, honorable mention

Another gold medalist was James Esbenshade, Solanco, who placed first over 22 contestants in tractor operation and maintenance He will compete in the State Farm Show.

William J Shirk and Robert Mohler, both of Garden Spot, were gold medal winners in the land judging contest, in

Three Future Farmers Elected To State Office

KENNETH MARTIN

Three Lancaster County Future Farmers were elected to state FFA offices yesterday at the association's annual convention on the Penn State Campus.

President of the Keystone Association of Future Farmers of America is Kenneth Martin, New Holland, of Garden Spot High School.

Vice President of Region II is Roy Slaymaker of Lampeter-Strasburg High School.

Elected Secretary is Harold Brubaker of Donegal High School.

ROY SLAYMAKER

HAROLD BRUBAKER

Colorado 4-H Club Members Visit Here

A group of 21 4-H Club members and five chaperones from Larimer County, Colorado, arrived in Lancaster County yesterday to visit points of interest in Lancaster County. They will stay in homes of local 4-H club members.

The 4-H County Council of Lancaster has planned several events to include all the guests and hosts able to attend

Today they will tour the Amish section by bus, leaving the Conestoga Valley High School, Horse Shoe Road, at 8 30 a m and returning about noon or shortly thereafter. Saturday evening at 8 they will attend a get acquainted party at the home of Clyde Wivell, ,Columbia R1 off the Marietta Pike, west of Silver Springs There will be square dancing and ice cream

Monday June 22, at 6 p m, a swimming party and picnic will be held in New Holland Park Local members are to bring their own hot-dogs or hamburgers (etc) Drinks and watermelon will be furnished

Other than these events, no organized activities are planned The remainder of the time will be spent according

Milk Production Up 8 Percent

Daily milk production in Pennsylvania during May averaged 27 74 pounds per cow. The Pennsylvania Crop Reporting Service said this was 8 per cent above April, 1 per cent above May, 1963, and 11 per cent more than the 1958-62 average.

May is the peak or flush month For the first five months of 1964 daily output per cow has been averaging from one fourth to two-thirds of a pound more than in the comparable period in 1963

Milk produced on Pennsylvania farms during May totaled 707 million pounds 12 per cent more than in April but 2 per cent below May of last year May production was 4 per cent above the 1958-62 average

The May estimate of 822,000 milk cows on Pennsylvania farms is down 2 000 from April, 30,000 from May, 1963, and 63 000 below the 1958-62 average.

Egg Production Up Two Percent

Pennsylvania egg production for May increased seasonally 2 per cent over the previous month This was the lowest May figure since 1941, according to the Pennsylvania Crop Reporting Service

The rate of lay per hen and pullet averaged 19 59 eggs during May, the highest so far this year Layers were estimat-

Weekly Broiler Report

Chicks placed in Pennsylvania for commercial broiler production during the week ending June 13, totaled 769,000 according to the Pennsylvania Crop Reporting Service. This was 13 per cent below the previous week and 10 per cent below a year ago. The 10-week total was 7 per cent below last year. Settings at 989,000 eggs dropped 18 per cent from a week earlier and 9 per cent from the comparable week last year. The 3-week total was 9 per cent above a year ago. Inshipments of broiler-type chicks for the past 10 weeks totaled 789,000 or 60 per cent above last year. Outshipments of 1,311,000 were down 35 per cent.

Placements in the 22 states remained about the same as the previous week and a year ago The 10-week total was down 2 per cent from last year. Settings dropped 3 per cent from a week earlier but were 3 per cent above last year. The 3-week total was 2 per cent above a year ago.

EASTERN PA. & N. J. LIVE POULTRY

Demand fair for light type hens, light for heavy type hens. Local offerings limited on both types with added supplies supplemented from various outside areas. Prices paid at farms for heavy type hens 12-14¢, light type hens 7-7½¢.

FOGELSVILLE, PA. AUCTION, JUNE 16

● New Holland

(Continued from Page 2)

with the market generally a little lower. Riding horses es 420 head changed hands brought $125-400, and driving horses were $125-260. Pony mares sold for $50-100 and geldings made $30-115. Killer horses were 6½ to 7 cents a pound.

The 330 market hogs sold $1 00 higher at the June 15 auction. Retail hogs to local butchers brought 18.50-19; grades 1 to 3 went to the packers at 17.75-18.35, and heavyweight hogs brought 16.50-17.50. Sows were 11 to 14. The 30 head of shoats brought 9.50-11 50.

At the June 15 auction, 85 head of calves sold steady. Choice and prime vealers brought 30-34, good and low choice 26-30, standard 23-26, and cull and common 18-22.50.

Delmarva Up Slightly

Live Broilers and Fryers advanced ¼ cent. Demand was fair for the ample auction offerings. Live supplies ranged ¾ lbs to 4 lbs. short for current needs. Ready to cook demand unaggressive. Most plants not operating Saturday.

Estimated slaughter by eastern shore processors for the weekend was 832,600 head compared to the 982,000 head last weekend. Live prices at farms during the period ranged 15.2 to 16 1 for reported purchases of 882,500 head including 538,600 head sold at Thursday's auction in Selbyville, Del. At the auction 50 per cent of the sales were at 15.5 to 15 9.

The Delmarva broiler-feed ratio for the week ending June 12 was up one point from last week at 3.0. Broilers during the week averaged 15 05 per pound and mash cost the grower $100.20 per ton. For the comparable week a year ago, the ratio was 3 0 when broilers averaged 14 99 and mash sold for 99 63.

From Where We Stand . . .

If We Grow It, We Gotta Sell It

Pennsylvania's apple growers are out to polish the apple.

A 15 point program to increase the sale of Pennsylvania-grown apples has been proposed by the state's newly organized Apple Marketing Advisory Council.

We believe the Advisory Council deserves commendation for recommending the 15 separate points, described as long range plans to strengthen the economy of Pennsylvania's apple industry. We further believe that other commodity groups could take the action as an example and do more work on selling the product of the fields.

The 15 points are included here as an example of what might be done by other groups interested in promoting the sale of agricultural goods.

1. Develop an industry-supported promotion program.

2. Prepare an apple certification program incorporating a quality seal to identify Pennsylvania apples.

3. Develop a set of quality standards and identification symbols for roadside markets, and possible certification of such markets.

4. Provide apple buyers with a directory of sources where Pennsylvania apples may be procured.

5 Seek a larger share of the military market.

6. Expand foreign markets for Pennsylvania apples.

7. Encourage greater use of apples and apple products at state institutions.

8. Increase use of apples and apple products in school lunch programs.

9. Provide or coordinate marketing research as needed.

10. Carry out an enforcement program against improper labeling and misrepresentation in advertising.

11. Improve industry communications to keep growers, processors and distributors informed of matters that affect the marketing of Pennsylvania apples in other states.

12. Compile a list of regulations in other states that would apply to the shipment or sale of Pennsylvania apples in out-of-state areas.

13. Prepare an annual report on cold storage holdings of apples in Pennsylvania after Dec. 1.

14. Hold a hearing to prepare regulations for controlled atmosphere storage of apples.

15. Publicize the apple industry on a statewide level.

We believe other groups might do well to consider assessing themselves for funds to promote their products.

At least that's how it looks from where we stand.

Two Faces

Automation has two faces. It is a great, horned monster that devours humans and it is a benevolent mechanism that dispenses riches and leisure time.

Generally, it is believed to live in sprawling factories or in the skyscraper headquarters of industry and commence.

But the spore of the creature can be found on every farm in Morrisons Cove And, both snarling and smiling, he leaves behind mixed blessings

Economists, industrialists and social scientists debate furiously about the effects of automation, while they agree that it is bound to increase.

Great factories are operated by a few men who read dials and charts, then push buttons to control the machines of production As better equipped competitors gain an advantage, or as costs of raw material or labor go higher, they turn toward more automation (and fewer workers) as a means of survival.

Down on the farm, the same principle applies. However, on family farms there is a further complication. How can a hard pressed farmer finance more and more improvements in the race to cut costs and increase productivity?

This substitution of capital for labor has more than doubled the investment per farm since 19550, according to Gov. R .B. Tootell of the Farm Credit Association. He said further:

"Production per worker on farms has increased more in the 13 years since 1950 than it did in the first 50 years of the century. This increase in effiency manifests itself in mechanization and the application of science and technology on the farm. These, in turn, are the result of increasing amounts of research and education which most surely will increase rather than decrease in the future.

"Because the internal generation of capital on most farms has not been adequate to finance these rapid changes, increased use of credit has become a necessity for most farmers. Farmers and ranchers of the U.S. are now using approximately twice the amount of credit used only 10 years ago."

The quality of the individual farmer, the man himself, as a manager has always been possibly the most important factor in making a loan — whether from an individual or a lending institution.

Now banks and Farm Loan Associations have a further responsibility. Lending a farmer money is not always the simple answer to a complex problem. The lender has the responsibility to "finance farmers constructively," as Gov. Tootell states it.

For years, people have been shaking their heads about the increased costs of starting a young farmer into business. But every year there are young farmers starting in business in the Cove. As it becomes more difficult, only the more promising are able to meet the standards.

Farming is not an occupation for the lazy or dull or the indifferent. It demands the best of a good man.

Our good, young farmers will meet the problems of automation and high finance as well as industry will.

Morrison's Cove Herald, Martinsburg, Pa.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY DR. KENNETH J. FOREMAN

Missionary Must

Lesson for June 21, 1964

Background Scripture: Matthew 28:16-20; Acts 1 6-8, Romans 1 8-16; 10 1-18. Devotional Reading: Romans 15.7-13.

IF A CHURCH is like a club, it is no true church. A club exists for the convenience, pleasure and benefit of its members. But a church is not chiefly for the benefit of its members, though they will receive many benefits by their being members. A club can close its doors and shut out anyone they don't like. But a church that is not open to all men, regardless, is not a true church. The minute Jesus said, "Go into all the world . . . make disciples of all peoples . . ." he opened the doors of the church once and for all, to every human being.

Dr. Foreman

"The church is mission"

Among the most memorable sayings of Jesus is this: "The Son of Man came not to be served but to serve." So the church exists to serve. When it forgets this, its days of usefulness are over. There are many forms of service in which the church can be active; but the basic, most vital service is winning souls, to use an old-fashioned but expressive slogan. The church exists for the transformation of the world through the transformation of lives from within. It is the only organization in the world with a purpose so profound and penetrating as this. Various words have been used to express this fundamental service of the church; too much used in our time are "evangelism" and "mission." It is often said that the church is mission, and this is true. The church as a whole, and every single person in it, is meant to be missionary in what it does and what it teaches. Christ's challenge is too plain for us to reject or neglect it.

Missionary here

Where is the place for the church—including you, if you are one of that great band—to be missionary? Not in some room in the church where the "missionary society" meets once a month. The whole church is meant to be missionary the whole time. Missions cannot be and will not be shoved into a corner by a true church. We can illustrate what is meant by looking at the case of a church that ran away. It was in a large city, and the neighborhood changed, that is, the houses began to get run-down, and there were more people around than ever. But they were mostly people the church gentlemen and ladies did not care for. So they moved the church . . . and soon the neighborhood to which they moved started to run down, and so they moved . . .. This went on for six moves, and finally one of the officers said sadly: "Seems there's no place that's safe." That church had been running away from people who needed help, poor people, displaced people, discouraged people.

Missionary there

Every Christian, it can't be said too often, is called by God to be missionary—that is, to be a radiating Christian, where he is. But some people are specially called by God to be missionaries there—far off, overseas, in the Congo or the back country of Brazil or in some great crowded city like Tokyo or Seoul. But how can I know whether God so calls me? Well, it's like this: Suppose you are a good swimmer and you are standing at the edge of a pool. You notice at one end of the pool a number of swimmers having trouble, but there's quite a flock of life-savers about; at the other end there are more swimmers in trouble and nobody noticing it or helping them. Now would you think you had to wait for a message from the skies to tell you what to do? Wouldn't your common sense tell you that if you can help where help is most needed, that's the place God wants you to be and to work? A need, and your ability to fill that need, is as good and plain a missionary call as you could ask for, to go there, from here. It may be that some are "sitting in darkness" this very day, waiting for you!

(Based on outlines copyrighted by the Division of Christian Education, National Council of the Churches of Christ in the U. S. A. Released by Community Press Service.)

Now Is The Time . . .

BY MAX SMITH

MAX SMITH

To Inspect Weeds In Corn

Due to the dry weather conditions in most parts of the county, the chemical weed killers may not do a very good job of killing weeds this summer In most cases the herbicides will not control weeds unless sufficient moisture is present If grass and weeds appear healthy and growthy after being sprayed for several weeks, we suggest that the field be cultivated in order to help control the weeds. Another spraying or heavier amounts of the chemical are not the answer to this moisture deficiency.

To Make Oat Silage

Spring oats may be made into silage with good feeding results. The proper stage of maturity to cut the crop is when the plants are in the flowering stage and before they develop into the milk stage. This will usually be only a few days after heading The crop does not require wilting and a feed additive may be used as a valuable preservative. If a new legume seeding has been made in the oats, it is suggested that the crop be cut 3 to 4 inches high.

To Circle July 9th

On Thursday, July 9, our Extension Service will conduct a Unit Demonstration Dairy Field Day at the farm of J. Wade Groff, Lancaster, #7. This all-day affair will feature forage variety, weed control, barn remodeling and farm management demonstrations and exhibits. We urge dairymen to mark this date and plan to attend.

Plan for Quality Sweet Corn

Both the corn borer and the corn earworm do considerable damage to the sweet corn crop. These may be controlled by timely sprays. Get the spray when the first tassels appear in the whorl of the stalk. Use four applications at 5-day intervals. The earworm is eliminated by spraying from 3 to 5 days after the first silks appear and the second application 5 days later. Use either DDT or Sevin for both these insects. Do not feed DDT treated fodder to livestock.

HERE'S A GOAL FOR '6 Increased security for yourself and the nation through increased U. S. Savings Bond purchases. Buy that EXTRA bond today.

MARKET EGG PRODUCERS

EFFICIENCY PAYS

DO YOU KNOW THAT:

- **A 12½% improvement in feed required per dozen eggs equals a saving of approximately $350.00 per 1000 hens.**
- **That our Early Bird All Mash Laying Feeds will definitely produce BETTER SHELL QUALITY over the laying year?**
- **That each ½% improvement in breakage can improve your income by $36.00 per 1,000 hens housed?**
- **A price improvement thru BETTER GRADE of ½ cent per dozen amounts to approximately $100.00 per 1,000 hens housed?**
- **If your feeding programs gives you 1% better hen house liveability and ½ dozen more eggs per hen housed, it can mean as much as $175.00 extra return per 1000 hens?**
- **That GOOD records pay big dividends? Without accurate records you CAN NOT fairly judge the value of your program?**
- **That it's not the START, it's the FINISH that counts.**

May We Help You Do A Better Job?

Crop Summary

Showers Aid Crop Growth

HARRISBURG — Showery weather during the week ending June 15 helped maintain adequate soil moisture for good growth of vegetation, according to the Pennsylvania Crop Reporting Service Pastures and cut over alfalfa fields have greened up nicely Soils were too wet to work early in the week but later considerable cultivation, spraying and hay making was accomplished Fruits continue to gain size and generally good production of all kinds is expected.

Above normal temperatures during the week encouraged rapid growth of corn, vegetables and other crops.

Barley is coloring and harvest of earliest fields will get under way in about a week Most of the wheat crop has headed and some is beginning to color. Good yields are in prospect

Oats are in varying stages of development Some winter oats in the south is heading. Planting, and some replanting, of corn is nearing completion.

Prospects for hay and pasture improved

Potato planting in the Potter county area is about completed Cobblers in the south are setting tubers Transplanting of tobacco in the Lancaster area made good headway. The strawberry harvest is progressing into northern counties Harvesting of peas for processing has started Sweet corn and tomatoes made good growth Planting of snap beans for processing continued.

Indications continue to point to the best fruit crops in years. Thinning of apples and peaches is well advanced Sweet and sour cherries are coloring. Spray schedules have been effective in controlling insects and disease.

The new $75 denomination Series E Savings Bond, bearing the portrait of the late President John F Kennedy, goes on sale during "Operation Security"—Treasury's 1964 Savings Bonds campaign.

Drumore 4-H Holds Meeting

The Drumore 4-H Sewing Club held its reorganization meeting in the Chestnut Level Church House recently Officers elected for the 1964 year were as follows: president, Janet Cutler; secretary, Andy Brenda Cutler; vice president, Burkins; treasurer, Glen Dora Hawthorne, game leaders, Sue and Jo Bookar; songleader. Peggy Housekeeper; news reporter, Nanci Kreider, and representative to county council, Brenda Cutler

Leaders are Sara Lee Bradley, Mrs Jesse Cutler, Mrs Jay Eberly, Mrs Robert Housekeeper, and Mrs Frances McSparren Judy Longenecker will serve as junior leader

● Wivell & Weaver

(Continued from Page 1)

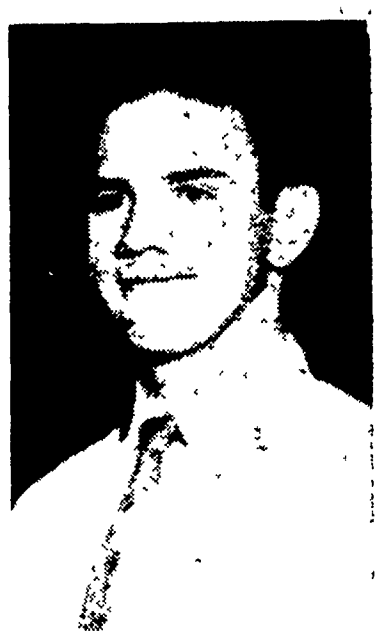
R1, treasurer; Eric Stoner, 1051 Eden Rd, publicity; Larry Brubaker, Elizabethtown R3, parliamentarian, and members-at-large: Sue Mumma. Manheim R1; Eugene Hosler, Manheim R3; Marie Bushong, Columbia

VIRGINIA WIVELL

R2 and Robert Wenger, Quarryville R1

Other Officers

Home economics officers



LARRY WEAVER

Gloria Hershey, New Holland, vice president, Lilli Ann Wivell, Columbia R1, secretary, Janet Imhoff, Ephrata R1, treasurer Linda Young, Manheim R4, parliamentarian Other Council members are Annette Long, Lititz R3, Rose Marie Myer, Elizabethtown Mary Alice Graybill, Lititz R2, and Karen Mellinger Bird-in-Hand

Breeders Name Mark Witmer As President

A Northumberland County breeder, Mark N. Witmer, Dalmatia R1, was elected president of the newly-merged Atlantic Breeders Cooperative, Wednesday.

Election of the former board president of Southeastern Pennsylvania Artificial Breeding Cooperative came during an organizational meeting of SPABC and Western Pennsylvania Artificial Breeding Cooperative in Holiday Inn.

Merger of the Lancaster and Clarion based cooperatives becomes effective July 1 Stockholders of the two state organizations approved the plan early this spring.

Other officers elected by the present 43-man board of directors were:

—J. Lewis Williams, Uniontown, vice president, formerly WPABC's president.

—Lee M. Poorbaugh, York R3, secretary, former CPABC secretary-treasurer.

—Clyde S. Robison, Coal Center R1, Washington County, former WPABC secretary-treasurer.

Harvey M Russell, Huntington R1, Tyrone County. Abner H Risser, Bainbridge R1, and W. Levis Phipps, Wilmington, Del., were named to the executive committee.

Goal of Treasury's 1964 Payroll Savings campaign is one million new regular bond buyers through payroll savings. "From every standpoint worthwhile and highly deserving," says President Johnson

GET RID OF
APHIDS, FLEA BEETLES and
COLORADO POTATO BEETLES
On Potatoes
Ask us about
Phosphamidon

Phosphamidon actually hunts pests down on potato plants. It kills them wherever **they're hiding** — under the curl of a leaf — in the crevice of a stalk.

This is because Phosphamidon doesn't kill by contact alone. It's absorbed by the foliage and goes through the entire upper part of the plant system. That means it kills hidden insects other sprays miss Phosphamidon gets rid of Colorado potato beetles, (even the resistant ones) — as well as flea beetles, leaf hoppers and all four kinds of aphids that attack potatoes.

Phosphamidon is absorbed quickly, too, so workers can enter the fields just a few hours after spraying. Why take chances on missing any potato pests. See us now for ORTHO Phosphamidon.

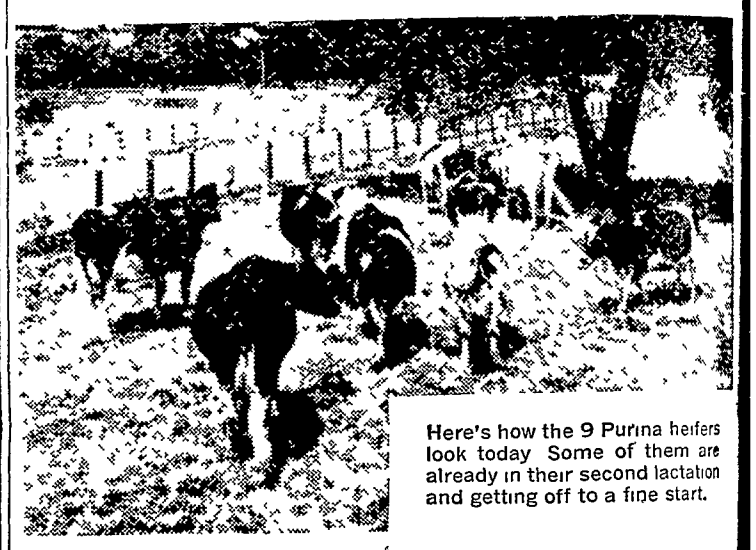
Checkerboard News



Here's how the 9 Purina heifers look today Some of them are already in their second lactation and getting off to a fine start.

9 Purina Dairy Research Center Heifers that freshened at 22 months

AVERAGED 10,808 LBS. MILK IN THEIR FIRST LACTATION

Here's proof that early freshening pays off! These heifers averaged freshening at only 22 months instead of the normal average of about 31 months . . . nearly a full lactation early! So each of them produced nearly 10,808 lbs. of "extra" milk in their first 305-day lactation, compared to heifers freshening at 31 months.

No. P 10's first calf was born dead. She started slowly, pulling down the average of the group. She produced only 6,697 lbs. of milk. On May 16, 1963. No. P 10 had a normal calving and she's now off to a much better start.

Projected mature production of these heifers (based on standard U.S.D.A. factors) figures 14,499 lbs One, P 11, has an estimated mature production of 19,062 lbs. of milk!

Years of research at the Purina Dairy Research Center, Gray Summit, Mo., has built feeding and management programs to help you grow animals fast for early breeding and freshening . . . for long, profitable milking lives.

Ask us to tell you more about proved Purina Dairy Feeding Programs. Pay us a visit . . . soon!

which 86 took part, and will receive a trip to a place of interest in or near Pennsylvania. Other winners in the same category were Bob Witmer, Garden Spot, and George Eisenberger, Solanco, silver medals; William Ulrich, Solanco, bronze medal; John Myer, Manheim Central, and Neil Schwendemann, Ephrata, honorable mention.

Raymond Myers, Manheim Central, won a gold medal among 192 contestants for dairy cattle judging. The first three winners will represent Pennsylvania in the National Dairy Show at Waterloo, Iowa, Oct 4 to 6.

A silver medal was awarded Thomas Zartman, Ephrata, in the meat judging contest, and Elmer Stoltzfus, Penn Manor, won a bronze medal in the same group, participated in by 32 boys.

In the livestock judging contest, with 129 competing, Kenneth Hess, Lampeter-Strasburg, and William Fisher, New Holland, both won silver medals.

Other local winners were:

Poultry judging contest, 68 contestants; Allan Hershey, Earl Myers, both Penn Manor; Nevin Hiestand, Elizabethtown, bronze award; Dale Hershey, Manheim, honorable mention.

Agronomy, 59 entrants: Robert Muehling, Penn Manor, bronze medal.

Dairy Products, 36 entrants, LeRoy Musser, New Holland, bronze award.

How to stretch the laying period

You know what a longer laying period means . . . more eggs. And more eggs mean more profits for you! That's what you get with Red Comb . . . **the feeds with balanced amino acids for better protein building.** Amino acids are the basic protein building blocks. When you balance them, you get top production, top profits. The people at Red Comb know this because they've spent more than 90 years in feed research and development. They've formulated feeds to the genetic capacity of flocks in this area. That's how Red Comb encourages your hens to lay up to their full potential. What's more, Red Comb feeds are seasonally adjusted, with proper nutritional balance in winter and summer. This means greater uniformity in production all year long. So let us help you get a longer laying period. Stop in or call soon.

RED COMB . . . the feeds with balanced amino acids for better protein building

Joseph M. Good & Son
Leola, Pa.

1 insecticide controls 7 major tobacco pests

USDA-approved Thiodan.

This single insecticide is outstandingly effective against hornworms, budworms, aphids, cabbage loopers, and green june bug larvae.

It will also control flea beetles. And stink bugs. (Not registered for control of stink bugs, but recommended by some states.)

You'll find Thiodan is easy to use. Saves mixing several specific insecticides. Does a better job with fewer applications. Saves time and money.

Use Thiodan on any type of tobacco. Without fear of injuring plants. Without adverse effects on flavor or grade of the treated leaf.

Get Thiodan as a liquid E.C. formulation. Or, (for quick knock down during heavy infestations) combined with parathion in liquid or dust formulations.

For the Farm Wife and Family

The Fourth Meal

By Mrs. Richard C. Spence

SPENCE

For the afternoon or evening snack be creative with favorite foods. Children and teenagers are good at concocting their own snacks with perhaps a little guidance from Mother.

Refreshing "shakes" made with milk and ice cream are the perfect partners for light summer snacks Stir them up at home, serve them frosty cold, and folks will think you have the luxury of a home soda fountain!

Cookies and bar cookies go well with any beverage, whether it be a fruit or milk drink Spreads for graham crackers are also a good solution to the snack problem These are nutritious as well as easy to make ahead and store for self service.

Here are some suggestions for graham cracker spreads—

PINEAPPLE CHEESE SPREAD

1 8-ounce package softened cream cheese
1 8½ ounce can crushed pineapple
½ cup maraschino cherries, chopped

Combine cream cheese with crushed pineapple Beat with electric mixer or by hand until smooth and creamy Stir in maraschino cherries Refrigerate until ready to use Makes 2 cups spread

CHOCOLATE PEANUT BUTTER SPREAD

1 6 ounce package semi-sweet chocolate pieces
3 tablespoons water
1 12-ounce jar chunk style peanut butter
½ cup milk

Melt chocolate pieces with water in a saucepan over low heat. In a mixing bowl combine melted chocolate with peanut butter and milk. Beat with electric mixer or by hand until well blended Chill. Allow to stand at room temperature about 15 minutes to soften. Makes about 2½ cups spread.

CREAM CHEESE AND PEANUT BUTTER SPREAD

1 8-ounce package softened cream cheese
⅓ cup milk
1 12-ounce jar chunk style peanut butter
¼ cup light corn syrup

Combine cream cheese, milk, peanut butter and corn syrup in mixing bowl. Beat with electric mixer or by hand until light and fluffy. Refrigerate until ready to use. Makes 2½ cups spread.

* *

BANANA PEANUT BUTTER SPREAD

1 12-ounce jar creamy peanut butter
2 bananas
⅓ cup milk
2 tablespoons confectioners sugar

In a mixing bowl combine peanut butter, bananas, milk and sugar Beat with electric mixer or by hand until light and fluffy. Refrigerate until ready to use. Makes 2½ cups spread.

* * *

Here are some ideas for the refreshing drinks we suggested.

CHOCOLATE-PEPPERMINT SHAKE

6 cups (1½ quarts) chocolate milk
1 quart peppermint ice cream

For each milk shake, mix ⅓ cup milk and 1 scoop ice cream in the bottom of glass. Fill glass ⅔ full with milk; stir until blended Top with 2 scoops of ice cream. Six 10-ounce servings.

ORANGE-CHOC. SHAKE

¾ cup (6-ounce can) frozen orange juice concentrate
¼ cup confectioners sugar
1 quart vanilla ice cream
1 quart chocolate milk

Allow orange concentrate to thaw; blend in sugar. For each milk shake mix 1 scoop ice cream, 2 tablespoons orange-sugar mixture and ¼ cup milk in bottom of glass. Fill glass ⅔ full with milk; stir until blended. Top with 2 scoops ice cream. Garnish with orange slice, if desired. Six 10 ounce servings.

LEMON-BANANA SHAKE

¾ cup (6-ounce can) frozen lemonade concentrate
1 cup diced fresh banana
3 cups milk
1 quart vanilla ice cream

Allow lemonade concentrate to thaw. Add banana and beat with electric mixer or rotary beater to jelly-like consistency For each milkshake, mix ¼ cup milk, 1 scoop ice cream and ¼ cup lemon-banana mixture in bottom of glass Fill glass ⅔ full with milk stir until blended. Add 2 scoops ice cream. Six 10-ounce servings.

ORANGE-MOCHA COOLER

2 tablespoons instant coffee powder
⅓ cup sugar
¼ cup hot water
⅓ cup frozen orange juice concentrate, thawed
1 pint vanilla ice cream
5 cups cold milk

Combine coffee powder, sugar and hot water; stir until sugar is dissolved; add orange juice concentrate. In large mixing bowl beat ice cream until softened; add coffee orange mixture and blend thoroughly.

(Continued from Page 8)

Add milk and beat until frothy. Serve immediately.

* * *

RASPBERRY MILKSHAKE

3 tablespoons raspberry jam
1 cup milk
2 scoops (about 1 cup) raspberry sherbet

Beat or mix in electric blender the raspberry jam, milk and sherbet. Makes 2¼ cups

* * *

PINEAPPLE STRAWBERRY SHAKE

1 8¾ ounce can pineapple tid-bits, drained
½ cup milk
2 scoops (about 1 cup) strawberry ice cream

Beat or mix in electric blender pineapple tid-bits, milk and ice cream. Beat until well blended Makes 2 cups.

* *

PEACH BUTTER PECAN MILKSHAKE

1 1-pound can sliced peaches, drained
1 cup milk
2 scoops (about 1 cup) butter pecan ice cream

Beat or mix in electric blender the sliced peaches, milk and ice cream. Beat until well blended. Makes 3 cups.

*

APRICOT MILKSHAKE

1 12-ounce can apricot nectar
Few drops almond extract
2 scoops (about 1 cup) vanilla ice cream

Beat or mix in electric blender apricot nectar, almond extract and ice cream. Beat until well blended. Makes 2¼ cups.

* * *

Here are some ice cream toppings—

CHOCOLATE FUDGE SAUCE

1 14-ounce can sweetened condensed milk
1 7-ounce jar marshmallow creme
½ cup milk
¼ cup butter or margarine
¼ teaspoon salt
1 teaspoon vanilla extract
1 6-ounce package semi-sweet chocolate pieces

Combine sweetened condensed milk, marshmallow creme, milk, butter or margarine and salt in a medium size saucepan. Cook, stirring constantly over medium heat until mixture thickens slightly and is almost boiling. Be careful not to allow mixture to burn on bottom of saucepan. Remove from heat. Stir in vanilla extract and semi-sweet chocolate pieces. Stir until chocolate has melted and sauce is smooth. Serve warm over ice cream Sauce may be refrigerated and reheated. Makes 3 cups sauce.

BUTTERSCOTCH SAUCE

¾ cup sugar
½ cup white corn syrup
1 cup whipping cream
¼ teaspoon salt
2 tablespoons butter

Combine all ingredients in a saucepan except the butter. Cook and stir over moderate heat until temperature of 225 degrees is reached on a candy thermometer. Add butter and cook until butter melts. Remove from heat immediately. Cool and serve.

This sauce would be nice served this way Cut a cantaloupe in half and remove seeds. Cut into 1 to 1½ inch slices. If tulip-cut edge is desired, cut cantaloupe in zigzag fashion Place cantaloupe slices on individual serving plates Spoon ice cream into center of each serving. Pour Butterscotch Sauce over all. Serve with hot or iced tea.

THOMAS

Some Tips On Salad Preparation

When preparing a salad, wash and dry, then chill all greens Do the same for fresh fruits and vegetables you plan to use Drain canned fruits and vegetables before chilling

Cut chicken and meat into uniform bite-size pieces, and flake fish for easier eating

When using fresh peaches or bananas and apples, dip the slices in orange or lemon juice to prevent browning

Tear lettuce and other salad greens instead of cutting and you'll prevent unnecessary wilting.

Add salad dressing just before serving, & use only enough dressing to moisten the ingredients. The dressing should enhance the flavors of the salad ingredients, not mask them

Practical Gifts for the Bride

If you're in doubt about a gift for the bride, why not consider something for her kitchen? A meat thermometer is one idea, another is an open, shallow roasting pan with a rack. The thermometer indicates when the meat is cooked to perfection and the open pan insures correct roasting procedure.

For braising and for simmering the less tender cuts of meat, a Dutch oven with a tight-fitting cover serves a dual purpose.

A deep fryer-type skillet with a close-fitting lid can be used for braising, pan-broiling, and frying.

Easier Housework During Summer

Rearrange furnishings to suit your family's summer schedule and you can ease your housework

Consider what furniture groupings will be needed for recreation and relaxation, whether in the living room, family room, or outdoors.

Also think about where you

will cook and where the family will dine

You may need to rearrange sleeping accommodations for guests.

Shift furniture to provide easy access and leave the major traffic lanes apon and direct to avoid unnecessary tracking.

You can eliminate unnecessary cleaning if you put away furnishings and accessories you won't be using during warm weather And if you can provide outdoor living and dining areas, you could save some energy.

Penn Manor 4-H Sewing Club Meets

The Penn Manor 4-H Sewing Club held a meeting on Wednesday, June 10 at 9 a m.

Each member was asked to suggest a new name for the club. The one chosen was The Penn Manor Clashing Thimbles. It was suggested by Linda Fair.

The club elected Peggy Eshleman and Linda Fair to represent the club at the 4-H Queen Contest, junior and senior division respectively.

The next meeting was held June 17 at 9 a m. in the Penn Manor Junior High School.

Donegal 4-H Club Meets

Dairy Month was stressed at the meeting of the Elizabethtown Donegal Community 4-H club held recently at the home of Mr and Mrs. John J Herr, Mount Joy R1, Pa

President Larry Brubaker was in charge of the business meeting.

Mr. Victor Plastow, assistant county agent, represented the extension office at the meeting.

Mrs Herbert Royer, chairman of the Dairy Princess contest for Lancaster County, spoke to the group about the importance of milk in your daily diet and the Dairy Princess contest to be held Tuesday. Virginia Wivell, Columbia R1, will vie for the crown.

Pat Yuninger had charge of games and the president appointed Barry Borry, Donald Miller and Bill Hackman to the program committee for next meeting, which will be held Tuesday, July 14 at the home of Larry and Fay Brubaker, Elizabethtown P3.

Doris Thomas Speaks To Farm Society Nineteen

"Understanding Today's Woman" was the subject of Mrs Doris Thomas, associate home economist for the extension service, when she spoke to members of Farm Women Society 19 Saturday.

The group met at the home of Mrs Herbert Rowe, 2865 Lititz Pike, Neffsville Cohostess for the meeting was Mrs Abe Witmer.

The group made contributions to the migrant workers, and to the Child Development Center They also decided that instead of sending a box of gifts to their Korean orphan they would send a cash gift of $20 instead.

Two charter members of Farm Society 19 were appointed to help in the task of writing a history of the Farm Women's Societies which is under the direction of Mrs Kenneth Eshelman The two are Mrs Harold Saylor and Mrs. Lloyd Hollinger

On Sunday, July 19, a family picnic will be held at Buchanan Park at 12:30 p m Food and Game Committee will be headed by Mrs Harold Hollinger for the event Members are to bring their own chairs and table service to the picnic

Hobby Show Held By Soc. 25

A Hobby Show was held in connection with the Saturday meeting of Farm Women Society 25 when they met at the home of Mrs Glenn Naumann, Lancaster R6.

Twenty members answered the roll call, telling of what their family hobbies were

Unusual hobbies featured at the meeting included an 85 pound ball of string belonging to Mrs. Beatrice Newswanger The ball includes pieces of string from every state but Colorado, from every province in Canada, and from several foreign countries

Mrs Helen Metz showed the group her collection of bracelets from around the world Other hobbies featured included embroidery, painting, rugs, china, knitting, prize roses and ceramics

Mrs Emma Goss led devotions for the group The society will entertain as cohostess with the county executive board at the County Home during July. They will also participate in Rock Ford Open House which will be held August 8.

Society 14 will entertain Society 25 at the home of Mrs. Roy Book, Ronks R1, on Sept. 9

High-yielding grasslands may produce 12,000 to 15,000 pounds of milk or 600 to 700 pounds of beef or lamb per acre per year.

Farm Women 21 Hold Meet

Twenty-two members of Farm Women Society 21 answered roll call telling of their "something old, something new, something borrowed, something blue" worn at their wedding, at a recent meeting of the group.

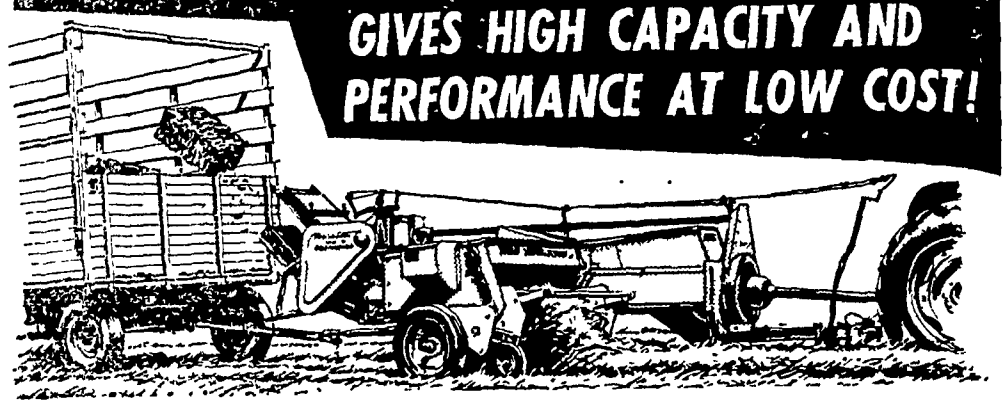
Hostess of the event, Mrs Charles Tindall Jr., led the devotions.

At the business meeting monetary donations were made to the migrant workers fund and to the Child Development Center. President Mrs Richard Jackson announced that the County Farm Women convention will be held at the Solanco High School on the first Saturday in November

Mrs. Mary Jo Wood was installed as a new member

NEW HOLLAND COMPACT HAYLINER® 65

GIVES HIGH CAPACITY AND PERFORMANCE AT LOW COST!



New Holland's Compact Hayliner 65 with optional Bale-Thrower lets you bale and load twice as fast with half the manpower.

Here's New Holland's economy baler with deluxe features, scientifically designed for high capacity and performance at low cost. Flow-Action feeding system "sizes up" windrows on the go for smoother, more accurate feeding of hay into each bale slice. Simplicity of design means fewer moving parts, so hay is handled less, saving valuable leaves.

New Holland's Compact Hayliner 65 makes easy-to-handle compact bales . . . just right for modern random loading. Coupled with the optional Bale-Thrower (PTO or engine), you bale and load in half the time it takes with manual loading.

The "65" is economical to operate and initial investment is less. With the "65" you can have a baler *and* a Bale-Thrower for the cost of a conventional baler alone.

STOP IN FOR DETAILS.

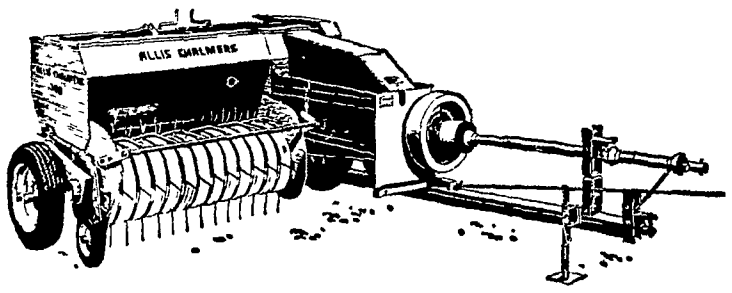
TWIN RAKE FEEDING WITH "ELBOW FORK" ACTION



MAKES THE BEST BALES YET

303 BALE-CHIEF

Twin Rakes on the new Allis-Chalmers 303 Bale-Chief make bales solid, square—tied tight. The kind an ejector can throw. Bales resist buckling because "Elbow Fork" action takes out windrow wads that can make other bales pop their twine. Takes heavy windrows into the chamber in clean, sweeping action. Forks retract completely up and out of hay each back stroke. No drag or auger-churning to shred leaves. Big capacity. Come see this new 303 Bale-Chief now.

New Holland Opens New Visitors' Center

A new Visitors' Center, with 12,000 square feet of covered exhibit space and facilities for tourists, was officially unveiled last week by New Holland Machine Company, the farm equipment manufacturing division of Sperry Rand Corporation.

The company showed off the Center at an opening-day program that also included lunch, a guided tour of the firm's baler assembly plant and an informal question and answer session conducted by New Holland president, George C. Delp.

Among those attending the program were John K Tabor, Secretary of the Pennsylvania Department of Commerce, Robert R Shoemaker, Director of Vacation and Travel Development, Pennsylvania Department of Commerce, local tourist bureau officials and representatives of news media.

Main part of the guest area is an 80-by-120 foot building containing a display of late-model New Holland farm machines. Other current pieces of company equipment are exhibited outside on the Center grounds and in a 40-by-60 foot tent. Also on view is the first automatic hay baler, which New Holland introduced in 1940, and several gasoline engines the company manufactured in the early 1900s.

Guests will register in the main building, where they'll be treated to refreshments and have the opportunity to relax in special lounge facilities. Films produced by New Holland will be shown in a separate projection room in conjunction with an introduction to the company by Center personnel.

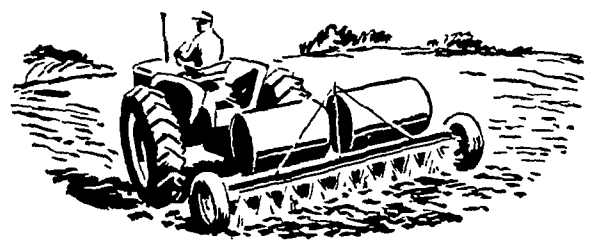
Tours of the baler plant, a highlight of the New Holland visitor "package," are scheduled regularly Monday through Friday and are conducted by trained guides.

AVAILABLE THRU YOUR LOCAL FEED DEALER OR HARDWARE STORE

FERTI - FOLIAGE
FOR LEAF FEEDING

The practice of foliage feeding is now an integral part of all good fertilization programs. The ease of application and the immediate availability of nutrients absorbed through the foliage assures rapid feeding at all times. Experiments show that plants will absorb as much as 95% of a properly formulated fertilizer when applied to the foliage. Less quantities of material are required due to the high efficiency of this type of plant feeding — thus — less bags to handle and lower over all cost in fertilizing. Applied with a standard sprayer, application time is cut to 1/5 that of applying dry materials. When combined with an insecticide or fungicide spray two jobs are done in one application thus more savings in time and labor.

Increase Yields - Better Quality Crops



Earlier Maturity For Top Prices

This Year Can Be **Your** Best With Clover Liquid Fertilizers

FERTI-FOLIAGE is a scientifically formulated water soluble liquid fertilizer, with varying ratios of nitrogen, phosphorous, potash, plus high percentages of the secondary and trace elements. Vitamin B1, is added for root growth development and the all important CLOVER'S special penetrating agents for fast plant assimilation.

FERTI-FOLIAGE is dissolved at the rate of 3 to 5 pounds in 50 gallons of water and sprayed according to directions. It is non-corrosive to equipment and will not burn when used as directed. Foliage feeding does not replace the need for ground type fertilizer — it is a booster as a leaf feeder.

Manheim Beauty Is In NEPPCO Queen Contest

A 123-lb. dark-haired, dark-eyed beauty from Manheim, Pa, is the first entrant in the contest to select the Poultry Princess of the 14 northeastern states sponsored by the Northeastern Poultry Producers Council (NEPPCO).

Mary A. Romberger, 20, has filed the initial application to take part in the NEPPCO Poultry Princess Pageant highlighting the annual exposition of NEPPCO in Harrisburg, on Oct. 6-7-8. Entrants from all sections of the 14-state northeastern area are expected to apply during the immediate weeks ahead, contesting for the $500 U. S. Savings Bond first prize and a year's activity as the reigning princess.

Miss Romberger, daughter of Mr. and Mrs. Mark T. Romberger, 68 New Charlotte St., Manheim, filed her application at NEPPCO headquarters, 10 Rutgers Place, Trenton, N. J., in cooperation with her official sponsor, Hess Brothers, Inc., eastern egg marketing firm located in Ephrata, Pa.

Last year, Hess Brothers sponsored Miss Joan Martin of Lancaster, who won second runner-up position.

The Pageant will be held in the Penn Harris Hotel, Harrisburg, Pa. on October 7. It is part of the activities associated with NEPPCO's 27th Annual Exposition and Convention in Harrisburg's Farm Show Building, October 6-7-8.

4-H Wildlife Club Elects Beth Lueck

The 4-H Wildlife club meeting was held June 17 at the home of Theresa Charles, Lexington, daughter of Mr. and Mrs Daniel Charles.

The club elected Beth Lueck, daughter of Mr and Mrs. Arnold Lueck, as a contestant for the Lancaster County 4-H Queen in the junior division.

The speaker was Mr. John Zuck who showed the club some taxidermy work. He demonstrated on a purple grackle and the way to mount different birds.

The club's next meeting will be a swimming party on July 15.

3 simple facts that make Amprol Solution the leading coccidiostat for controlling outbreaks in growing pullets—indoors or out

1. AMPROL® Solution helps stop coxy flare-ups fast
"Starves" coccidia to death.
Effective against mixed coxy infections, too.
Helps wipe out mortality in your flocks.
Tested, tried and proved on millions of birds.

2. AMPROL Solution doesn't cause setbacks
No bad effects on start or length of lay.
No bad effects on fertility, hatchability.
No bad effects on normal growth.
Lets birds begin to lay on schedule.
Causes no harmful side effects

3. AMPROL Solution is easy to use
Mixes smoothly into water—simply stir.
Won't clog in any water-medication system.
Ideal for automatic water proportioners.

...and it's tops for broilers, too
Causes no harmful side effects.
Helps eliminate condemnations.
Helps eliminate downgrading.
May be used in the presence of "hemorrhagic disease."

NOTE: If AMPROL Solution doesn't control a coxy outbreak within three days, better check for coccidiosis. Could be some other disease giving [illegible]
